Summary

Full Stack Developer and final-year IT student with industry experience building scalable, production-grade systems using React, Node.js, and MongoDB. Skilled in architecting REST APIs, real-time systems, and microservices — with proven results across AI SaaS, CI/CD engines, and Web3 platforms. Passionate about shipping robust, high-performance solutions using cutting-edge technologies.

Education

Marathwada Mitra Mandal's College of Engineering, Pune
B.E. in Information Technology

2022 – Present
CGPA: 7.25

Skills

Languages: Java, JavaScript, Python, SQL

Tools & Cloud: Git, Docker, Postman, Qdrant, Redis, WebSockets, BullMQ

Frontend: HTML5, CSS3, Tailwind CSS, React, Figma

Coursework: DSA, OOP, DBMS, OS, Cloud Fundamentals

Backend & DB: Node.js, Express.js, MongoDB, PostgreSQL

Others: Software Development, Machine Learning Basics

Work Experience

Climkare Sustainability Pvt Ltd

Aug 2025 – Present

Full Stack Web Developer | React, Tailwind, Node.js, ERC-1155, IPFS, MongoDB, Web3, QR Systems

- Collaborated in a 5-member team to build a **blockchain-based carbon credit tokenization** platform, developing a responsive UI and integrating frontend with backend APIs for seamless data flow.
- Designed **RESTful APIs** for authentication, project management, and transactions; used **Ethers.js** to interact with smart contracts for token minting, retirement, and on-chain verification.

Project Work

TalentLens | AI-Powered Smart Resume Analyzer & Career Coach

React, TypeScript, Node.js, FastAPI, MongoDB, Redis, BullMQ, Docker, Nginx, Gemini, Groq, OpenAI, spaCy, Qdrant, Tailwind CSS

- Architected a **Full-Stack AI SaaS** with Node.js + FastAPI microservices, offloading NLP to a decoupled Python service — cutting main server **CPU overhead by 45%** and supporting **50+ concurrent jobs** via **BullMQ & Redis**.
- Built a **Semantic Job-Matching Engine** using OpenAI **text-embedding-3-small** and **Qdrant Vector DB**, enabling **sub-100ms** retrieval with a hybrid **spaCy NER + TF-IDF** pipeline — boosting skill extraction precision by **35%** over regex parsers.
- Engineered a **Multi-Provider AI Fallback Chain** (Gemini, Groq, OpenAI) with exponential backoff, achieving **99.9% AI uptime** and reducing analysis latency by **70%** (8s → <2s) via Gemini 2.0 Flash prioritization.
- Designed an **AI Resume Coach** with STAR/XYZ rewriting and structured JSON output achieving **99% parse reliability**; secured with **JWT auth**, **S3 pre-signed URLs**, and per-endpoint rate limiting.

VortexCI | Distributed CI/CD Pipeline Engine with Real-Time Observability

Node.js, Express.js, React, Docker, Redis, Bull, PostgreSQL, WebSockets, GitHub Webhooks API, HMAC-SHA256

- Architected a **Distributed CI/CD Engine** using Node.js, Express, Redis & Bull, automating build-test-deploy via **GitHub Webhooks (HMAC-SHA256)**, supporting **500+ concurrent build jobs** through horizontal scaling.
- Containerized **Build Isolation** with Docker ephemeral + Alpine images, cutting **build-start latency by 40%** and achieving **0% environment drift** across local and production stages.
- Built a **Real-Time Observability Dashboard** in React via WebSocket pub/sub streaming, cutting log delivery latency by **60% (under 100ms)** and eliminating polling overhead entirely.
- Engineered a **Fault-Tolerant Recovery System** with stuck-job detection and auto re-queuing, achieving **99.9% pipeline reliability** backed by a normalized PostgreSQL schema with step-level execution metrics.

Certifications

Deloitte Technology Job Simulation – Deloitte (via Forage), 2026

Deloitte Data Analytics Job Simulation – Deloitte (via Forage), 2026

AWS Academy Cloud Foundations – AWS Academy (via EduSkills Internship), 2026

AWS Academy Cloud Architecting – AWS Academy (via EduSkills Internship), 2026

Achievements

5th Place – Smart India Hackathon (Internal Round) out of **120 teams**.
